- Analyze, design and develop web applications in a multi-tier Java EE environment
- Database schemas design and query optimization
- Implementation of Systems Integration
- Estimate tasks required to complete various development projects including time and resources
- Identify and apply appropriate modern technologies and techniques for software development
- Technical Support and Preparation of Design Documents

Required Experience & Qualifications:

- **4+ years of experience** in Java Applications Development
- BS / MS in Computer Science or equivalent experience
- Extensive experience in MVC model and solid knowledge on the following technologies: Spring, Struts2, Hibernate, Ibatis, Maven
- Experience in SOA and Web Services
- Experience in relational database design and SQL
- Knowledge of HTML5, XML, XSL, CSS/3, Javascript
- Experience in JEE application servers
- Experience in Mobile Development will be considered as a plus
- Experience in Liferay CMS will be considered as a plus
- Expertise with development life-cycle methodologies and best practices
- Excellent troubleshooting and problem solving abilities
- Ability to work in a fast-paced environment and meet set deadlines
- Good communication and collaboration skills

If you want to make a difference and work with a top-rated team of talented individuals, come and join us. We offer a friendly, diverse work environment and very competitive benefits package. If this position is of interest to you and matches your background and career needs, we can't wait to hear from you! Please email your CV at jobs@motivian.com
