

Web Developer

Location: Patras Science Park, Patras

Contact details: recruit@spacehorizon.us

Company Profile

Founded in 2016 **Space Horizon SA** is a shipping company, which offers products and services for the Maritime IoT market. Space Horizon currently seeks for talented software engineers.

Position Summary

The Web Developer will be responsible for the design and development of software features in our products, targeted to the Maritime market. You will join a team of experienced and talented software engineers based in Patras Greece, with years of history delivering high-quality products.

This position requires passion for designing and building excellent software, and offers the opportunity to increase your skills and competencies to new levels.

Responsibilities

- Develop, unit-test, performance-test, debug, troubleshoot, maintain software features for our products, existing or new, based on the Linux platforms
- Contribute to writing software requirements, design specifications, and to task effort estimation
- Develop code using high-level programming languages and scripting languages
- Interact with senior internal personnel, to consider project approaches, select methodologies, jointly plan tasks, and coordinate your activities with fellow engineers
- Establish and maintain thorough documentation of your work; assist with review of technical specifications' documentation
- Follow established practices and procedures, to achieve overall project performance, schedule, and quality standards

Qualifications and Requirements

The position requires a Software Engineer professional with 2+ years of related work experience in software development in Linux; or a holder of an MSc or higher degree in Computer Science (or related discipline) with a specialization directly relevant to our product lines.

Essential requirements

- Bachelor's degree or equivalent in Computer Science, Electrical Engineering, or related field; equivalent experience may be substituted for formal education
- Proficiency in Linux programming, software development tools
- Expert in at least 1 scripting language and 1 database engine:
 - SQL Server (T-SQL &/or Admin), MySQL, Oracle, Postgres
 - PHP, JSP, Java, VBScript, ASP/.NET, ADO, ADO.Net
 - Apache, IIS, other
 - XML and XSL Good experience in Database programming
- Strong foundation and discipline in software engineering processes
- Solid understanding of networking and data communications
- Strong written and verbal English communication skills

Desirable attributes

- Master's degree in Computer Science or equivalent
- Knowledge of source-control management concepts and tools
