

PELAGOO

Architectural Visualization Designer

Pelagoo | Internship | Greece | Remote

Pelagoo's mission is to build sustainable and resilient remote island communities through environmental, educational, technological and hospitality innovations. We strive to create a lasting, positive impact on people's lives, guided by sustainability, respect for nature and inclusive development.

Pelagoo is developing an integrated Masterplan that combines sustainable design, small-scale architectural interventions and low-impact tourism activities. We are looking for an **Architectural Visualization Designer** to support the conceptual and visual development of the project through AI-driven design tools.

Responsibilities

- Support the creation of architectural and spatial visuals using AI tools
- Assist in transforming spatial and topographic information into conceptual visuals
- Contribute to design narratives, moodboards and visual storytelling
- Support the preparation of presentations and concept documentation

Qualifications

- Student or recent graduate in Architecture, Interior Design, Spatial Design or related field
- Interest in architectural visualization, conceptual design and AI tools
- Basic familiarity with architectural design software (SketchUp, Rhino, AutoCAD or similar)
- Strong visual thinking, creativity and willingness to learn

Nice to Have

- Exposure to AI image generation tools
 - Basic experience with 3D visualization or rendering
 - Interest in sustainability or landscape-related projects
-

What We Offer

- Hands-on experience in a real-world masterplanning project
- Exposure to AI-enhanced architectural workflows
- Portfolio-building opportunity
- Flexible and remote-friendly internship
