

Software testing engineer

Location: Patras Science Park

Working model: Partly remote

Job Summary: We are seeking a detail-oriented and experienced Software Tester. The ideal candidate will have a strong understanding of software testing methodologies and practices, as well as hands-on experience with various testing tools. The Software Tester will be responsible for ensuring the quality and reliability of our software products through meticulous testing and documentation.

Key Responsibilities:

- Develop, execute, and maintain test plans, test cases, and test scripts for various software applications.
- Perform functional, regression, integration, and system testing to identify defects and ensure the software meets requirements.
- Collaborate with development and product teams to understand requirements and provide feedback on design and implementation.
- Identify, document, and track defects and issues using bug tracking tools.
- Conduct root cause analysis of defects and work with developers to resolve issues.
- Participate in the review of software specifications and documentation to ensure accuracy and completeness.
- Perform automated testing using appropriate tools and frameworks.
- Assist in the development and improvement of QA processes and procedures.
- Provide detailed and accurate test reports and metrics to stakeholders.
- Continuously update knowledge of industry trends and advancements in testing methodologies and tools.

Qualifications:

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- 2-4 years of experience in software testing or a similar role.
- Strong understanding of software development life cycle
- Proficiency in using testing tools such as Selenium, JIRA, or similar.
- Experience with automated testing frameworks and scripting languages, preferably python.

- Excellent written and verbal communication skills in English.

Preferred Skills:

- Experience with performance and security testing.
- Familiarity with continuous integration/continuous deployment (CI/CD) processes.
- Basic knowledge of programming languages such as Java, Python, or JavaScript.

What We Offer:

- Competitive salary and benefits package.
- Opportunity to work on cutting-edge technology projects.
- Collaborative and dynamic work environment.
- Professional development and growth opportunities.

How to Apply: Please send your resume and a cover letter to recruit@spacehorizon.us
