

Position: NETWORKS ENGINEER & SECURITY RESEARCHER FOR EUROPEAN PROJECTS (ON-SITE)

[Job Reference ID Number: P0008]

We are seeking a talented and dedicated Networks Engineer and Security Researcher to join our team for European projects. As a Networks Engineer and Security Researcher, you will play a crucial role in designing, implementing, and securing network infrastructures for our cutting-edge projects across Europe.

Main Responsibilities:

- Design, monitor and maintain network and security systems, also diagnosing and resolving technical problems and issues. This task will mainly involve systems, designed and implemented for the company's research activities.
- Participate in project planning, providing technical insights and recommendations to ensure that the security requirements of the company's deployed networks are met.
- Collaborate with cross-functional teams to integrate security controls into network architecture and systems.
- Keep abreast of emerging technologies and trends in the field of network engineering and security.
- Provide guidance and support to junior team members, sharing your knowledge and expertise in network engineering and security research.
- Manage national and European research projects, monitor their progress, participate in meetings (physical and virtual), prepare necessary reports and deliverables.

Desired Qualifications:

- Bachelor's degree in Computer Science, Information Technology, or a related field. Master's degree or PhD is a plus.
- Experience in network engineering, including design, implementation, and troubleshooting of complex network infrastructures.
- Knowledge of network protocols and network security concepts, technologies, and tools.
- Strong analytical and problem-solving skills, with the ability to identify and address network and security-related issues.
- Excellent communication and collaboration skills, with the ability to work effectively in a team environment.
- Experience with European projects or other research activities.
- Fluency in English is required.
- Ability to travel abroad.

Skills to be considered positively:

- Conduct security assessments, penetration testing, and vulnerability assessments to identify potential risks and implement appropriate security measures.
- Familiarity with security frameworks and standards.
- Certifications such as CCNA, CCNP, CISSP, or equivalent are highly desirable.

We offer competitive compensation packages, a stimulating work environment, and opportunities for professional growth and development. Join our team and be part of a dynamic organization at the forefront of 5G and 6G network research.

All interested applicants are requested to send their CV to info@p-net.gr

As the position is on-site, candidates who do not reside in Patras, are requested to kindly send a cover letter indicating their intent to reside in Patras, Greece.
