

Job Title: Power BI Expert

Location: Patras Science Park, Patra, Greece

Job Type: Full time

Job Summary:

We are seeking a highly skilled and detail-oriented Power BI Expert to join our dynamic team. The ideal candidate will have extensive experience in data visualization, business intelligence, and analytics. You will be responsible for designing, developing, and maintaining BI solutions that provide actionable insights to drive business decisions.

Key Responsibilities:

- Develop and maintain Power BI dashboards and reports to support various business needs.
- Work with stakeholders to understand business requirements and translate them into technical specifications.
- Integrate Power BI with various data sources, ensuring data quality and consistency.
- Create data models and establish connections between data sources to optimize reporting capabilities.
- Conduct data analysis to identify trends, patterns, and insights that can drive strategic decision-making.
- Ensure data security and compliance with organizational policies and industry regulations.
- Provide training and support to end-users to enhance their ability to utilize Power BI tools effectively.
- Collaborate with IT and other departments to improve data workflows and integration processes.
- Stay updated with the latest Power BI features and advancements to continuously improve reporting capabilities.
- Troubleshoot and resolve issues related to Power BI dashboards and reports.

Qualifications:

- Bachelor's degree in Computer Science, Information Technology, Data Science, or a related field.
- Proven experience as a Power BI Developer or similar role.
- In-depth knowledge of Power BI, including DAX, Power Query, and M language.

- Proficiency in SQL and experience with data modeling and database management.
- Strong analytical skills with the ability to collect, organize, analyze, and disseminate significant amounts of information with attention to detail and accuracy.
- Excellent communication skills with the ability to present complex data insights in a clear and concise manner.
- Experience with other BI tools (e.g., Tableau, QlikView) is a plus.
- Familiarity with cloud platforms such as Azure or AWS is desirable.
- Ability to work independently and as part of a team in a fast-paced environment.

Preferred Skills:

- Certification in Power BI (e.g., Microsoft Certified: Data Analyst Associate).
- Experience with Python or R for data analysis.
- Knowledge of machine learning and AI concepts.
- Familiarity with data warehousing concepts and ETL processes.

Benefits:

- Competitive salary and benefits package.
- Opportunities for professional development and continuous learning.
- Collaborative and innovative work environment.
- Flexible work hours and remote work options.

Application Process:

Interested candidates should submit their resume to recruit@spacehorizon.us
